Photography

## Second Place:

Architectural  
Resource

## Third Place:

Jamsco, Inc, T/A  
Maggio Roofing

This blacksplash project began with the search for a perfect Asian-themed image that would be etched onto 3/4-in. black granite.

The designers searched through past Asian art classics discovering the work of Utagawa Hiroshige, a master of the Japanese woodblock prints. With computer

creation, the designers were able to simulate the images and colors showing the client her new blacksplash.

With the final selection, a 15-sq.-ft. custom blacksplash was designed in-house for the client. To achieve the color, artists at Aquarius Laser carefully hand-stained the stone to match the home decor.
